

Collaboration Statement:

W3Schools:

[W3Schools](#) was used to read documentation about packages used for the project (NumPy and Matplotlib). It was also used to understand the input and return arguments for built-in python functions, as well as learn how python objects work and how to import files. [Stack Overflow](#) was used to troubleshoot specific coding bugs or research types of algorithms that could be used.

Chat GPT:

Chat Gpt was used to troubleshoot bugs. Most issues were caused by faulty logic, messing up given formulas, or using the wrong variables. Ai was also used to answer questions about what certain error messages meant.
